MEMORANDUM.

In the case of Imports the values given represent the values of commodities, landed in Bangkok. They do not include the amount of duty. In the case of Exports the values represent the cost of the goods, including all charges thereon up to the time of their delivery on board ship; they thus include the duty.

The quantities and values of both Imports and Exports are given whenever possible. But in the case of Imports liable to an ad valorem duty great difficulty is experienced in obtaining quantities. Even those given must be accepted with caution. More reliance may be placed on the values, which are subject to check at the hands of the Department's Officers. In the case of Exports, on the other hand, where the duty is leviable on quantities, the difficulty is to obtain proper values. Deductions can in such cases be more accurately drawn from a comparison of quantities. This is particularly so in the case of Rice.

Imports are credited to their original countries of consignment whenever possible, but large quantities of goods are, of necessity, credited to Singapore and Hongkong for want of further information. In the same way many goods are shewn as exported to Singapore and Hongkong which are obviously intended for transshipment, but the ultimate destination of which cannot be ascertained.
