LONDON:  
PRINTED BY HARRISON AND SONS.  
1881.

*Commercial Report by Her Majesty's Agent and  
Consul-General in Siam for the Year 1880.*

---

THE exports for the year 1880 as compared with those of the preceding year show a total falling-off in value of about one-tenth, the imports of about one-fortieth. The former is chiefly due to the not uncommon circumstance of a slightly deficient rice crop, the immediate cause being a want of rain in the up country. A little care bestowed on keeping up the old canal and irrigation system would remedy accidents of this kind and an increased country population would bring a great extent of available, but now unused, land into cultivation; but with the exception of a mere trifle to be mentioned further down, not a single dollar has been expended during the year by the Siamese Government in any public work of any utility whatever; roads, bridges, canals, means of transport or communication and the like having been absolutely ignored and falling daily into deeper decay.

Taxation already excessive has, it appears, been urged with the utmost severity, and the increase of opium shops, spirit shops, gambling hells, and the like, all of which are Government monopolies, has been freely encouraged. Hence a progressive diminution, both of the means of subsistence and of the population itself, accompanied necessarily by a rise in the price of labour, and often, by a total want of hands. The existence of slavery, which exists as yet in full force throughout the kingdom, contributes greatly to the latter want as indeed to the general nullity of manufacture and skilled labour of all sorts throughout the country. These facts are mentioned as explanatory of the present condition of trade in Siam and its future prospects.

The diminution in the quantity of imports is naturally less rapid, it being a slow following but a certain consequence of decreased exports. Should the latter continue, the former may be expected to keep proportion with it.

The timber trade continues to drag on with little alteration, but the uncertainty of life and property in the provinces, the want of legal protection or redress throughout the kingdom, and the arbitrary and excessive tolls imposed by the holders of the local Customs on the river and canal ways in all their embranchments effectually prevent its attaining any great development.

With regard to private enterprise two new rice-mills have been opened during the year, and two more are in process of construction. The management and generally the ownership of these mills are Chinese. Indeed the rice export trade with a large proportion of the residual commerce is in the hands of the Chinese, who have also taken up garden planting, cane growing, and sugar making to some extent, but with no great success owing to the causes above enumerated. In the upland provinces they have of late appeared as rice cultivators in place of the diminishing Siamese.

No new European firm, shop, or enterprise of any kind, a travelling circus excepted, has been undertaken during the year, and those firms already existing are loud in their complaints regarding the stagnation of trade.

A small red floating light has been placed to indicate a dangerous point near the entrance of the Menam River.

Partly owing to a cessation in the demand for Siamese sapphires, partly to the great unhealthiness of the district and the lawless condition of its inhabitants, the sapphire fields in the province of Batombong are now almost wholly abandoned. The gold mines of Kabin are also at a standstill, due in this case, it is said, to administrative negligence and mismanagement.

In accordance with an agreement made between the Governments of Siam and that of British Burmah preparation has been entered on for putting Bangkok into telegraphic communication with Tavoy and the Anglo-Burmese coast, but the line to be followed is undetermined as yet.

The depreciation of the Siamese coinage is also a matter which as one of the depressing influences on trade and commerce calls for notice in the present Report. The Siamese currency is silver, its standard coin being the "tical," the value of which is fixed by Royal Edict at three-fifths of the Mexican dollar.

It is subdivided into fourths, also silver, called "salungs," and those again are divided into halves, also silver, called "fuangs." The coinage takes place in the mint within the walls of the Royal Palace, and the silver employed is nominally at least that of the Mexican dollar purchased for the purpose. But a progressive depreciation caused, it is conjectured, by an undue increase in the alloy of inferior metal with the silver itself, has now reached such a point that the Siamese tical though maintained by official pressure at its original tender value, namely, 60 cents within Siamese territory, cannot even at the neighbouring port of Singapore command an exchange of 40 cents, that is, two-thirds of its nominal rate.

(Signed) W. GIFFORD PALGRAVE.
